

# TOP ENTRY AGITATORS

ProMixUSA offers a comprehensive range of side-entry agitators. Both belt-drive and gear-driven designs are available for the most demanding applications, including digesters, bulk storage, and asphalt.

## Horsepower and Speed Ranges:

Small 1-10HP @ 120-420 RPM

Medium 15-30HP @ 150-500 RPM

Large 40-100HP @ 150-420 RPM

## Shafts and Impellers:

Custom-engineered for each application. Our full range of impeller designs delivers superior mixing performance and reliable, trouble-free operation.

## Bearings:

Heavy-duty lubricated bearings with a minimum 50,000-hour L-10 life deliver long-term reliability and are designed for easy maintenance.

## Housing Designs:

Fabricated with heavy-duty construction for superior rigidity and long-term, trouble-free operation. Supported by guide rods or foot-mounted designs with outboard pedestal supports.

## Positive Shutoff Devise:

Permits bearings and mechanical seals to be changed under full head.

## Shaft Seals:

A complete range of shaft seals is available, including stuffing box, single mechanical, and double mechanical seals.
